

## NiMH Battery Operating Instructions

**CAUTION** Please read these instructions carefully prior to using!

### Safety Precautions

- **IMPORTANT:** To avoid battery leaking, overheating or explosion, strictly follow these instructions! Misuse of battery may lead to leakage, heat generation or explosion. Battery becomes hot during use. Battery temperature may exceed 80C(175F) even under normal operation and may cause burns or affect the shape of some materials.

#### **DANGER**

- Failure to follow instructions associated with this symbol risks injury or even death!
- If battery liquid enters the eye, immediately flush continuously with clean running water and seek medical treatment immediately. Serious and permanent eye damage may occur.

#### **WARNING**

- Failure to follow instructions associated with this symbol risks injury or even death!
- Avoid battery liquid contact with skin and clothing. If contact occurs, remove contaminated clothing and wash skin thoroughly with water.

Before Use: Read and understand the battery and charger operating instructions before recharging

#### **DANGER**

- ONLY use genuine charger units for recharging brand NiMH batteries.
- Ensure polarity is correct when plugging a battery into the charger unit.
- NEVER plug a battery directly into household outlets or cigarette lighters in cars!

#### **WARNING**

- NEVER place a battery into water.
- If you find an irregular noise, temperature, or any leaking from your battery, stop using it immediately.
- Keep battery away from exposed flame, high temperatures and humidity.

100-0018

During use: Always monitor a battery while it's charging so you can react to any unexpected problems

#### **DANGER**

- NiMH batteries are ONLY for use in R/C (radio control) models! Do NOT use them for any other purpose!
- NEVER disassemble or modify a battery!

#### **WARNING**

- Do NOT remove or cut the outer tubing from a battery!
- Discontinue charging immediately if the charge time has been exceeded, even if the battery is not fully charged.

A battery is recyclable. At the end of its useful life, under various national, state or local laws, it may be illegal to dispose of a battery into the municipal waste stream. Check with your local solid waste officials for details in your area for recycling options or proper disposal.

### Warning

- Use caution when holding the battery. Do not drop or attempt to dismantle the battery or any parts of the battery.
- Do not mix usage of old and new cells or cells of different sizes, different chemistry an/or types in the same battery assembly.
- Do not heat or dispose of battery into fire, water and/or other liquids.
- Do not place the battery into microwave, washing machine and/or drying machine.
- Do not use a damaged battery (such as swollen, deformed, voltage is lower than 0.9V, outer destroyed, etc...)
- Do not place batteries near heating sources, or expose to direct sunlight for long periods. Elevated temperatures can result in reduced battery life cycle.
- Do not short-circuit the battery positive and negative terminals.
- Do not charge, discharge or store that battery above or below the battery specifications.
- Do not disassemble the battery.
- Before charging battery, must make sure the correct connected polarity, far away easy fire objects and children when charging. Do not charge hot battery, make it cool before recharge; Never leave batteries unattended while charging.
- Do not leave battery installed in your model while not in use.
- Do not charge the battery while installed in models.
- Before using, customers must read above information recommended.
