Beast II... What's in store for you?

1/14 Beast II 6 x 6 chassis with Mil-Spec Hard Body

# DRIVETRAIN

The R3 scale 2 speed transmission comes with a tough cast metal case and new wider gears to allow for more abuse along with a Delrin spur with slipper clutch. Also features a sturdy billet aluminum motor mount for durability.

The Beast II includes the Triton Transfer Case. Packed with scale detail, the Triton features a cast metal exterior and heavy duty .8 Mod widened gears for durability.

Drawing on the success of the RC4WD MOA gear sets, the Beast II drivetrain has the most durable gears RC4WD has to offer so the Beast II can stay on the trail day after day.

The most scale accurate axles on the market, the RC4WD Cast Yota II Axles feature innovative 8 degree round knuckles, unique removable diff covers, new mounting points and a compact offset pumpkin in front.

The Driveshafts for the Beast II are a design featuring bulletproof steel universals and a high quality plastic shaft for great driveline angles and durability on the trail.
