Experience the versatility and advanced design of the Gelande 2 for yourself. Packed full of capability, the Gelande 2 is ready for any challenging condition. Put your off-road driving to the test and see why the G2 can easily maneuver extreme descents and climb with ease.

The G2 is built with quality materials and craftsmanship like the R3 single speed transmission providing power down to the transfer case and out to the Yota II axles.

The G2 comes with a 4 link rear and 3 link panhard bar suspension as a standard feature. The chassis mounted servo is out of view for a more scale appearance.

The G2 is completely versatile and can pull off many looks and styles. With the countless options available, RC4WD let's you customize your G2 exactly how you want without sacrificing performance. From emergency and expedition vehicles to daily drivers and hard core rock climbing rigs, the core of the G2 is built for the true off-road enthusiast!

This G2 now includes everything you need down to the battery and charger to start hitting the trails right out of the box!

Are you ready for your off-road experience?

GELÄNDE

DRIVETRAIN

The R3 Single Speed Transmission comes with a tough cast metal case and wider gears to allow for more abuse along with a Delrin Spur with Slipper Clutch. It also features a sturdy billet aluminum motor mount for durability.

The G2 includes the Hammer Transfer Case. Packed with scale detail, the Hammer features a cast metal exterior and heavy duty .8 Mod widened gears for durability.

Drawing on the success of the RC4WD MOA Gear Sets, the G2 Drivetrain has the most durable gears RC4WD has to offer so the G2 will stay on the trail, day after day.

The most scale accurate axles on the market, the RC4WD Cast Yota II Axles feature innovative 8 degree round knuckles, unique removable diff covers, lower mounting points and a compact offset pumpkin in the front.

The Driveshafts for the G2 are a design featuring bulletproof steel universals and a high quality plastic shaft for great driveline angles and durability on the trail.

TERRA GELATIDE

SUPERSTION

The G2 Chassis features a molded fuel cell that doubles as an electronics storage box plus an aluminum, frame-mounted under cab electronics tray for multiple electronics mounting options. Also includes a sturdy battery tray with strap mounts.

The G2 includes a set of new RC4WD Dual Spring Shocks. An all new design, these ultimate scale shocks offer realistic looks and the ultimate in performance. Machined from billet aluminum with dual springs and totally rebuildable.

The G2 Chassis is a machined billet aluminum ladder frame with an all link suspension design, scale shock hoops, chassis servo mounts and hard body mounting points for the ultimate in strength.

The G2 includes a set of RC4WD Black Stamped Steel 1.9" Internal Beadlock Wheels. Featuring a super tough black finish, aluminum internal locking ring and popular 5 lug design with separate hub.

Every G2 needs a tough set of rock grabbing tires and the included Dirt Grabbers in X3 Compound deliver the traction as well as perfect scale looks in just the right size.

GELÄNDE

The G2 features the Defender Scale Body Set. The Defender body has an awesome assortment of scale details including mirrors, door handles, vents and grilles to match the 1:1 vehicle.

The unmistakable lines of a classic. The Defender Body Set is an exact replica of the full scale vehicle. No other scale body comes this close to realism.

The Defender Body Set comes in durable hard plastic and painted in a beautiful forest green with a clean white roof. All the trim parts are separate pieces to get a great look, with minimal fuss.

Comprised of over 70 parts, the Defender Body Set features a full detailed interior, seats, gear shifter, handbrake and a detailed dashboard. It's all here to bring your build to next level.

The crisp lines and subtle details are all captured. Black plated parts are included as well as colored lenses for all signal lights. All lamps can be illuminated with minimum modifications.
