Experience the versatility and advanced design of the G2 for yourself. Packed full of capability, the G2 is ready for any challenging condition. Put your off-road driving to the test and see why the G2 can easily maneuver extreme descents and climb with ease. The G2 is built with quality materials and craftsmanship like the R3 single speed transmission providing power down to the transfer case and out to the proven Yota II axles.

The G2 comes with a 4 link rear and 3 link panhard bar suspension as a standard feature. The chassis mounted servo is out of view for a more scale appearance.

The G2 is completely versatile and can pull off many looks and styles. With the countless options available, RC4WD let's you customize your G2 exactly how you want without sacrificing performance. From emergency and expedition vehicles to daily drivers and hard core rock climbing rigs, the core of the G2 is built for the true off-road enthusiast!

Are you ready for your off-road experience?

1/10 SCALE PERFORMANCE R/C TRUCK RTR W/CRUISER BODY SET (RED)

RC4WD GELANDE II RTR TRUCK KIT W/ CRUISER BODY SET

The R3 Single Speed Transmission comes with a tough cast metal case and wider gears to allow for more abuse along with a Delrin Spur with Slipper Clutch. It also features a sturdy billet aluminum motor mount for durability.

DRIVETRAIN

The G2 includes the Hammer Transfer Case. Packed with scale detail, the case features a cast metal exterior and the same heavy duty 0.8 Mod Widened Gears for durability.

Drawing on the success of the RC4WD MOA Gear Sets, the G2 Drivetrain has the most durable gears RC4WD has to offer so the G2 will stay on the trail, day after day.

The most scale accurate axles on the market, the RC4WD Yota II Ultimate Scale Cast Axles feature innovative 8 degree round knuckles, unique removable diff covers, lower mounting points and a compact offset pumpkin in the front.

The punisher shafts for the G2 feature bulletproof steel universals and a high quality plastic shaft for great driveline angles and durability on the trail.

RTR TRUCK KIT W/ CRUISER BODY SET

The G2 Chassis features a molded fuel cell that doubles as an electronics storage box and an aluminum, frame mounted under cab electronics tray for multiple mounting options for your electronics. Also includes a sturdy battery tray with strap mounts.

The G2 includes a set of RC4WD Dual Spring Shocks. These shocks offer realistic looks and matching performance. They're machined from billet aluminum and are completely rebuildable.

The G2 Chassis is a machined billet aluminum ladder frame with an all link suspension design with scale shock hoops, chassis servo mounts and hard body mounting points for maximum strength.

The G2 includes a set of OEM Stamped Steel 1.9" Beadlock Wheels. These wheels provide a super tough white finish, aluminum internal locking ring and popular 6 Lug design with separate hub.

Every G2 needs a tough set of tires, the included Tomahawk 1.9" Scale Tires in X2S³ Compound deliver the traction as well as perfect scale looks in just the right size.
