DRIVE TRAIN

The R3 Single Speed Transmission comes with a tough cast metal case and wider gears for durability and a Delrin Spur with Slipper Clutch for performance. It also features a sturdy billet aluminum motor mount for added toughness.

The Trail Finder 2 Chassis includes the Hammer Transfer Case that features a cast metal exterior and heavy-duty .8 Mod Widened Gears, ensuring lasting functionality.

Drawing on the success of the RC4WD MOA Gear Sets, the Trail Finder 2 Chassis has the most durable gears RC4WD has to offer, capable of staying on the trail day after day.

The most scale-accurate axles on the market, the K44 Ultimate Scale Cast Axles feature high steer knuckles, XVDs, lower mounting points, and a compact offset front pumpkin.

The driveshafts found on the Trail Finder 2 Chassis feature heavy-duty uni-joint metal shafts for great driveline angles and durability on the trail.

The Trail Finder 2 Chassis has a multi-purpose, molded fuel cell that serves as an electronics storage box and provides additional RC realism by storing away any protruding wires.

The Trail Finder 2 Chassis includes Ultimate Scale Shocks 80mm (Chrome) with Internal Springs. These ultimate scale shock absorbers offer realistic looks and performance. They are machined from billet aluminum with internal springs and rebuildable internal parts!

With strength in mind, the ladder frame design of the Trail Finder 2 Chassis is made with CNC machined, billet aluminum and comes with scale shock hoops, a chassis servo mount, and transmission and transfer case mounts.

This truck includes a set of Rally 1.9" Beadlock Wheels (Black). The wheels are stamped steel and have a smooth black finish with a black finish beauty ring for extra detail.

Every RTR needs a tough set of tires to hit the trails and the included Dick Cepek 1.9" Mud Country Scale Tires deliver the perfect amount of traction with its advanced X3 soft and sticky compound. The scale details complete the look in just the right size.
